How to present prints for competitions

Prints can be any size from 7x5 up to a max of 20x16 inches.

All prints entered into competitions must be mounted. Max size including mount must not exceed 20x16 inches

If you opt to enter a 20x16 print, it must be flush mounted on a 20x16 board.

you can mount prints be either sticking them onto a board using a spray adhesive, or most popular using a

window mount. (A sheet of mount board with the relevant aperture cut out)

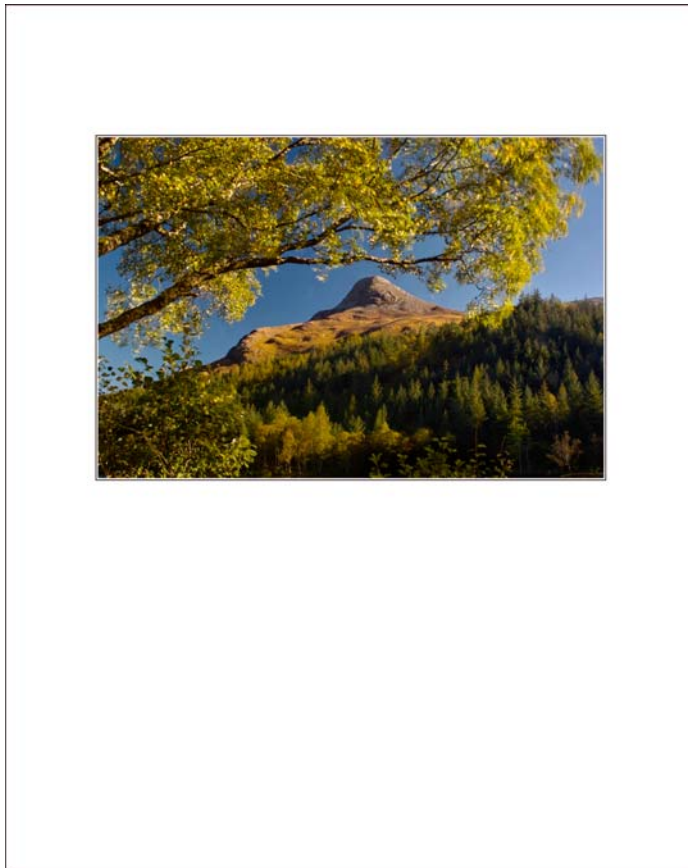

An A4 print
Window mounted on an A3 mount
in landscape orientation.

An A4 print

on a 20x16

The same A4 print this time on a 16x20 mount in an offset landscape orientation.

In this, our print is 20x16 and flush mounted on a 20x16 mount.

As you can see there are many ways in which to prepare your prints for competition.

The examples shown are a small selection of what is possible, not only with the size of your print and mount style choice, but also the colour of your mount board.

Below you'll see the difference a black mount can sometimes make to an image.
